Farmington Based Walker Systems Support Named to Inc. 5000 List for Third Consecutive Year

Farmington, CT, September 15, 2009 – Walker Systems Support, a leader in network management security and computer support services, as well as pioneer of the stakeholder business model, is pleased to once again announce their inclusion in the 2009 Inc. Magazine listing of 5,000 fastest-growing private companies in the US – receiving a ranking of 3,133. This is the third year that Walker has received this prestigious honor. Each year Inc. Magazine celebrates the remarkable achievements of today's entrepreneurial superstars. The Inc. 5000 list honors those small to medium-sized, privately-held businesses, that demonstrate remarkable growth during the past year and who are recognized as the catalyst for driving our economy.

"As a social enterprise, we are especially honored to be included in the Inc. 5000 listing again," stated Katherine Emery, Walker's Founder and CEO. "It helps to demonstrate that while our business model puts profitability behind making a contribution, it has helped us to be a successful company in the traditional sense as well. It is also a clear demonstration of a lot of hard work and dedication by each and every one here at Walker to providing unparalleled technology support to our clients."

"Savvy trend spotters and those who invest in private companies know that Inc. 5000 is the best place to find out about young companies that are achieving success through a wide variety of unprecedented business models, as well as older private companies that are still expanding at an impressive rate," said Inc. 5000 project manager Jim Melloan. "That's why our list is so eagerly anticipated every year."

The 2009 Inc. 5000 serves as a unique report card on the U.S. economy. Despite the ongoing recession, aggregate revenue among the companies on the list actually increased to \$214 billion, up \$29 billion from last year, with a median three-year growth rate of 126 percent. These companies are also responsible for creating more than 1 million jobs since their founding; making the list perhaps the best example of the impact private, fast-growing companies can have on the economy.
